Leading the move

SVLPL is a name which has become synonymous for safe and satisfactory delivery of goods, a familiar name for custom made solutions in the field of transportation and material handling across India. Over the years the SVLPL has evolved and grown exponentially to become an organisation to reckon with. With a rich legacy, a progressive outlook and a consistently superior track record, the Group remains committed to excellence and delivering satisfaction to its customers.

Vision and Mission

MISSION

- We aim to provide innovative, practical and top quality logistic services that improve business solutions.
- Our Roadmap is to add value to client and business partners through consistent pursuit of excellence and commitment to our values.
- To maintain the highest level of integrity and continue to utilize all of our resources solely for betterment of the organisation.
- We constantly endeavour to provide our employees with a stimulating yet secure working environment where their individual talents are embraced and nurtured.

VISION

To be recognized as an organisation that provides qualitatively a comprehensive range of strategic transportation.

VALUES

- We treat our associates, clients and employees with honesty and integrity. We stand by our commitments consistently.
- We follow the philosophy that open communication is conducive to trustworthy and enduring productive relationships.
- We strive to be good corporate citizens, focused on safety, family values, and quality of life, making a positive difference to our communities.
- We provide our Clients, Vendors, and Associates an environment that encourages teamwork and shares the rewards.
- And in quality; what we do, we do well.

Crane Services

The company has Cranes, Man Lifts and Fork Lifts of wide-ranging capacities and boom lengths which includes state-of-the-art imported cranes and equipment of reputed international brands like Liebherr, Demag, Manitowoc, Tadano to handle any type of General Cargo and Project Cargo including over dimensional equipment. Presently these cranes are deployed at different sites as per the client's requirements.

All equipment are regularly checked by qualified and authorized engineers and maintained as per Manufacturers' recommendations. With modern cranes, Man Lifts and Fork Lifts, PBL has the capacity to execute complex and voluminous industrial and construction operations.

Material Handling Services

The company provides Material Handling Services to major power projects across India during the project erection and implementation stages and has provided services to Industry majors, MNCs and PSUs like Bharat Heavy Electricals Limited, at various sites.

Customs House Agency Services

To add value to customers, We have a tie-up with CHAs in major ports, and can therefore undertake efficient customs clearance also.

Our clients include industry majors like Vedanta Aluminium Limited, Bharat Heavy Electricals Limited, Brahmani Industries Limited and other MNC's and PSU's.

Over Dimensional Consignments

SVLPL handles for large, over length and over height cargo by deploying a range of equipment including semi low bed and low bed mechanical trailers as well as hydraulic axles. Specifically designed trailers are also deployed to meet special requirements. At the same time, we manage and adhere to all the statutory aspects, including obtaining the permits required while delivering customer material using its strong knowledge of costs.

Heavy Lift Consignments

PBL handles heavy lift consignments with unique well planned and timely executed actions supported by a judicious mix of hired and owned fleet, capable of being mobilized as per customer's requirements.

Route Mapping & Surveys

When moving ODC or heavy lift consignments, PBL conducts extensive route surveys which help identify and address obstacles and plan alternative routes. We put to use our rich experience and expertise in this domain while leveraging technology, deploying a dedicated team and utilizing a strong knowledge base.

Experience

Over three Decades of delivering Value across Businesses and across India moving tons of varied materials for customers including PSUs, MNCs and companies spanning from biggest businesses to SMEs.

Technology

PBL runs on a fully integrated ERP based Service and Asset Management system to assist in timely maintenance and efficient tracking of our entire fleet. The application helps manage core business processes such as HR, Marketing, Operations, Motor Licensing, Vendor Management, Maintenance, Procurement and Accounting. We have flexible visibility options for enroute consignments based on GPS tracking and other technologies.

Processes

PBL is certified by Bureau Veritas and has time tested and well defined processes in line with ISO 9001:2015. Organizational processes and structures are well suited with continuous necessary customization done at all levels.

Finances

A number of key control parameters are of central importance for financial corporate management of PBL.

There is a long standing banking relationships with financial institutions and disciplined financial management with suppliers and partners through convenient payment mechanism. Risk mitigation done through insurance of operations, manpower and assets.

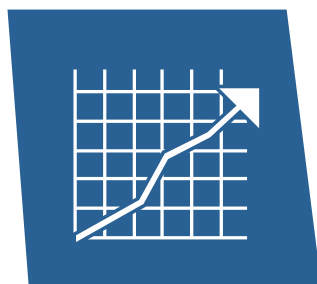

OWN WORKSHOP

The Company has its own fully integrated workshop spread over 4 acres of land for the maintenance and management of the total fleet of Trailers, Hydraulic Trailers, Cranes, Man-lifts and Forklifts. The company strictly adheres to the service and maintenance schedules as prescribed by the manufacturers, so as to ensure safe and trouble free operations. All personnel are trained and their skills upgraded at regular intervals by the equipment manufacturers. We also depute our staff for different orientation and skill development courses so as to keep abreast of latest trends and practices.

MOBILE SERVICE UNIT

Despite the above, if there is a break down, we have a special mobile service van fully equipped with all the necessary basic spares and infrastructure to attend to the same, so as to avoid any delay to the customer.

FUTURE PLAN IN PIPE LINE

Add new and latest advanced fleet of Transport and Handling equipment for providing the best of services to clients and increase our competitive edge. Also proposed are new branches in Western and Northern India. Future plans include providing warehousing facilities.
